

SOCIAL MEDIA

AND HOW TO USE IT

RESPONSIBLY

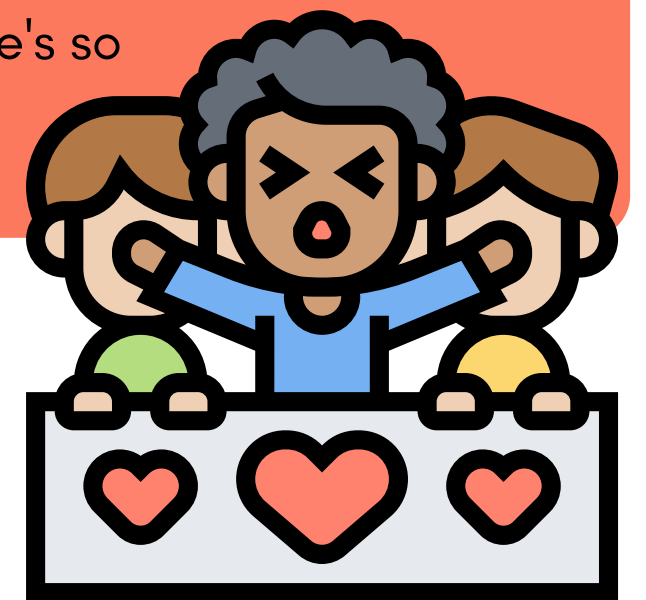

KEEP IN MIND: DATA PRIVACY ACT OF 2012

Data Privacy Act of 2012 ensures the protection of people's personal data and private communications on the internet as more Filipinos continue to use the internet. Any processing of private and personal data is under this republic act. With this, we shall keep in mind that any illegal way to process someone else's data on the internet can put you in jail. But as crimes like this can still happen, we should also do our part to secure our devices and accounts on the internet.

WISE USE OF FREEDOM OF SPEECH

Freedom of speech is one of the human rights each one of us has. With social media, we are given more platforms and ways to share our thoughts and opinions. However, it is our responsibility to distinguish when the practice of our rights is over-stepping someone else's so that all can feel safe on online platforms.

INTEGRATE LOUISIAN CORE VALUES

As Christians, while using social media, everything we do must be guided and imbued with our Christian spirit. We must continue to practice the beliefs of the Christian faith by acting with kindness, compassion, honesty, humility, and overall, we must choose to act with intellectual and moral virtue.

CHRISTIAN SPIRIT

Through the different social media platforms, we can post lots of creative content. These can be pictures, videos, stories, or even witty jokes. We can express and create anything freely and share them with people. And, those simple posts we share can actually have the power to inform, inspire, comfort, or entertain. Those are the best kinds of content.

INNOVATIVENESS

To use social media responsibly is to be aware that everything you do online can either positively or negatively affect others. Therefore, instead of spreading negativity, misinformation, and hate through social media, it is better to be informative, innovative, helpful, sociable, and kind all over social media.

ADVOCACY

COMPETENCE

When using social media, we should be competent, mature, and responsible enough. We should also be sensible enough to know and do the right thing always. Even under the anonymity that we have on the internet, we must not act like uneducated trolls. We should act with etiquette and refrain from being ignorant and unsophisticated.

SOCIAL INVOLVEMENT

One of the main uses of social media is to connect people. You can interact with probably anyone who is on the same platform as you. You can message and call anyone, anytime, anywhere in the world as long as you have an internet connection. Social media is a bridge made for people to socialize. So it is important that when doing so, we have our best intentions and attitudes.
